

# Ritetransfer

## Secure File Transfer

---

Getting your artwork from your computer to your outsourced printer can be a headache. At APG we have a solution:

- A reliable and fast way to transfer files
- Email confirmation of receipt of files to both the client and the studio
- Files arrive ready to be processed into the studio – no need to download files from other FTP servers – faster and more reliable

Ritetransfer is an intelligent and powerful file client/server communication portal enabling clients to submit jobs direct from their desktop.

Ritetransfer supports JDF output and can generate a JDF INTENT file if required. The Ritetransfer client performs file transfer, with automatic file compression/decompression, in the background without interrupting other activities. Clients and printers automatically receive an email notification once the job has been successfully transferred.

It works in 4 easy steps:

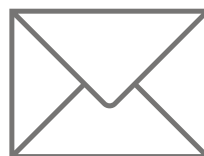

- Download software and set up password and email details
- Upload or transfer artwork files from your computer to APG
- Receive email confirmation once the artwork has been received at APG
- Relax in the knowledge that the job is in hand
